KOREA LIFE SCIENCE WEEK 2024: Meeting the future of global biological science

September 25, 2024 | News

2024. 11. 12(Tue.) ~ 14(Thu.), Hall B, COEX, Korea

Innovations in cutting-edge bio, life science, regenerative medicine, and convergence medical technology, all in one place.

KOREA LIFE SCIENCE WEEK 2024, Korea's leading life science industry exhibition, will be held at COEX in Seoul for three days, from November 12 (Tue.) to November 14 (Thu.), 2024. This exhibition will be held in conjunction with KOREA LAB Autumn 2024 (Korea Int'l Laboratory, Analytical Equipment & Biotechnology Exhibition) and will feature pharmaceutical and bio health, advanced biotechnology, regenerative medicine, convergence medical technology, experiment and analysis equipment, research and development (R&D), and the latest technologies and products in the equipment field. This event is a business platform where domestic and international experts participate and will be a crucial opportunity for technological innovation and industrial development.

B2B exhibition showcasing the latest technologies and products.

This exhibition will cover crucial technologies across the bio-industry, including biopharmaceuticals, regenerative medicine, CMO, CRO, and CDMO. In addition, KOREA LAB Autumn 2024 will introduce a wide range of equipment, from basic science and applied engineering experiment equipment used in laboratories to cutting-edge analysis equipment essential for R&D.

In particular, KOREA LIFE SCIENCE WEEK will showcase the latest bio-diagnostic solutions, digital healthcare, and pharmaceutical cold chain technology, focusing on biopharmaceuticals and biotechnology. At the same time, at KOREA LAB Autumn, cutting-edge equipment and R&D material and component technology in the research and experiment fields will also be introduced, allowing you to see the convergence of cutting-edge science and technology across R&D and production. Through this wide-ranged exhibition, participants will experience the latest technologies needed for bio and laboratory research and gain opportunities for cooperation and technological exchange between companies.

Various forums and seminars that lead the trend of the industry.
The highlight of this exhibition will be that experts in the industry and researchers will gather to discuss and explore the direction of the new technologies and strategies simultaneously in various forums and seminars.

Pharmaceutical/Bio Business Development Strategy Forum and Pharmaceutical/Bioheatlh Statistics Forum will take place on the first day to discuss business strategies in the bio-industry and growth potential in the global market. In the following Advanced Regenerative Medical Treatment Development Strategy Forum, the latest technologies and clinical research in the field of advanced biopharmaceuticals and cell and gene therapy will be presented.

In addition, innovative drug transfer technologies will be introduced in the Microneedle Fusion Seminar, and methods for maintaining data integrity and regulatory response strategies in the biopharmaceutical industry will be discussed in the Data Integrity Forum. Through these seminars and forums, participants will gain practical information that can be immediately applied in the field.

Creating business opportunities through IR and investment forums.
At KOREA LIFE SCIENCE WEEK 2024, an investment forum for promising bio ventures and startups will be held. Exhibitors will present the results of their research based on innovative technologies to the investors to seek potential investment opportunities. In addition, opportunities to partner and commercialize various technologies will be available during the IR presentation of pharmaceutical and bio companies.

Throughout the exhibition, other exhibitors will present their latest products and technologies, and experts in each field will share their updated solutions with the participants.

Opportunity for practical business cooperation between buyers and exhibitors.
The organizer is preparing a ‘Biz Partnering Program’ to support business cooperation among exhibitors. This program will provide an efficient way for buyers and exhibitors to connect by coordinating meeting schedules in advance. The program will expand the opportunity for cooperation between domestic and foreign companies and play a crucial role in promoting convergence and cooperation across industries.

In addition, a global networking reception (KOLS Beer Party) will be held during the exhibition to provide a comfortable environment for domestic and international experts to exchange and collaborate, contributing to creating new business opportunities.

Free visitor registration and exhibition information
This exhibition will be open from 10 AM to 5 PM every day from November 12th (Tue.) to November 14th (Thu.) and is free for visitors with advance registration. Detailed information, including the list of exhibitors, booth layout, and conference and forum schedules, can be found on the official website (www.lifescienceweek.com).
