PolyU and Shandong First Medical University partner to advance radiation oncology research in China

February 9, 2025 | News

To explore potential for collaboration in nurturing healthcare professionals

The Hong Kong Polytechnic University (PolyU) and Shandong First Medical University (SDFMU) have signed a Memorandum of Understanding (MoU) to explore collaboration on medical education and innovation, including nurturing healthcare professionals and joint medical research.

This partnership will synergise PolyU's education and research strengths in health technology and informatics, and SDFMU's extensive experience in clinical work and the application of cutting-edge medical technologies for tumour radiotherapy, advancing talent and research development in the field.

Under the MoU, PolyU and SDFMU will seek to develop various academic and professional exchanges and explore potential for collaboration in nurturing healthcare professionals, establishing joint laboratories and more. Capitalising on their respective strengths, both parties aspire to cultivate future medical talents and advance research outcomes, with the aim of contributing to the enhancement of healthcare standards in the Mainland and Hong Kong.
