Esco Lifesciences Group partners with Allwin Medical Devices to expand IVF portfolio

February 26, 2025 | News

Complementary balance between consumables and instruments

US-based Allwin Medical Devices Inc., a leading manufacturer of a wide range of medical devices addressing women's health, urology, gastroenterology and interventional radiology has partnered with Singapore-based Esco, a leading global provider of life sciences equipment that serves multiple global markets including the in vitro fertilisation (IVF) market, via a strategic partnership. Financial terms were not disclosed.

The IVF consumables portfolio of Allwin Medical will expand Esco's IVF instrument portfolio, and the combined product portfolio will have a complementary balance between consumables and instruments. IVF clinicians and embryologists who use either Allwin's consumables or Esco's time lapse or standard IVF incubators will have access to a more complete workflow solution.

The strong sales and operational presence of Allwin Medical in India will serve Esco well by providing the company with an established base and strong presence in the country, one of the largest and fastest growing economies in the world. Most significantly, the management and personnel of Allwin Medical have demonstrated exceptional talent, acumen, and expertise in the IVF consumables market. Their ongoing contributions to the advancement and success of Allwin Medical is highly valued.
