

Colorcon announces opening of new manufacturing facility in Malaysia

28 July 2025 | News

Johor plant is Colorcon's 7th major film coating plant and their 16th manufacturing facility worldwide

Colorcon, a global leader of film coating systems, specialty excipients, controlled release formulations and controlled atmosphere packaging for the pharmaceutical and nutraceutical industries, has announced the grand opening of a new, state-of-the-art film coating manufacturing facility in Johor Malaysia.

The 200,000 square-foot facility will immediately employ 30 people and will serve as the production hub for film coatings in the Asia Pacific region. Designed with cutting-edge technology and energy-efficient systems, the new plant reinforces Colorcon's dedication to industry innovation, superior quality, regulatory leadership and environmental stewardship.

Simon Tasker, CEO of Colorcon, said of the project, "We are thrilled to open this world-class facility to support our pharmaceutical customers throughout Asia. This investment is aligned with our long-term vision to strengthen and de-risk our supply model for film coatings worldwide. Our goal is to anticipate market growth, adding capacity to ensure we are always a step ahead of demand. This is just one of many development projects currently in our pipeline to support our credo of 'we're everywhere our customers need us to be.'"

Willem Hoogwater, Managing Director at Colorcon, added, "This is a monumental achievement for the local team, and I commend everyone who has played a part in bringing this facility to completion. We're proud to offer superior film coating technology and a world-class facility to this rapidly growing region. Malaysia has quickly become an important hub for high-value pharmaceutical manufacturing, and we're proud to support the local economy with an investment like this. We look forward to serving our regional customers even more efficiently for many years to come as a result."
