FUJIFILM Business Innovation Singapore launches strategic partnerships to spearhead AI-driven digital transformation

September 25, 2025 | News

Launch of large-scale data factory and data warehouse to boost Singapore's healthcare ecosystem and beyond

FUJIFILM Business Innovation Singapore signed a Memorandums of Understanding (MOUs) with three strategic partners namely Trusted Hub, Bizmann System, and ReN3, to deliver end-to-end digital transformation solutions from data management and process automation to AI-powered insights and content management. Over the next three years, these partnerships are expected to support transformation efforts across 1,000 companies.

As FUJIFILM Business Innovation Singapore commemorates its 60th anniversary this year, the occasion is made even more meaningful, aligning with the nation’s SG60 celebrations and marking six decades of progress and innovation. The MOUs signal a doubling down on its commitment to empower businesses with cutting-edge technologies, particularly AI, process optimisation, and intelligent outsourcing.

Driving digital transformation through strategic collaboration
These partnerships will unlock new possibilities for applying AI, automation and data intelligence to address complex business challenges, from streamlining critical operations to transforming customer experiences. By integrating advanced technologies with deep industry expertise, FUJIFILM Business Innovation Singapore aims to help organisations not only accelerate their digital transformation but also equip them with the tools and expertise needed to thrive in an increasingly AI-driven economy.

“AI, automation, and data are reshaping how businesses operate, from small and medium-sized enterprises to large corporations. The partnership mark a significant step in our journey to deliver secure, scalable, and AI-ready solutions that drive digital maturity” said Wee Tee Hsien, CEO of FUJIFILM Business Innovation Singapore.

Empowering businesses with new capabilities by fostering strong partnerships:
Singapore’s first legally-compliant digital data factory for AI and regulatory compliance
The launch of Trusted DataVerse, Singapore’s first legally-compliant large-scale data factory and data warehouse, marks a major leap forward in how organisations capture, store, and utilise both digitised paper records and born-digital data.

Bryan Wong, CEO of Trusted Hub said, “With the exponential growth of data, companies need scalable, legally compliant, and AI-ready solutions, especially for industries with stringent data compliance, high documentation volumes, and a strong

push for digital transformation, including banking, financial services, insurance, **healthcare**, legal and government sectors.”
