

Abbott acquires Exact Sciences in \$21 B deal to transform cancer care

21 November 2025 | News

Acquisition adds a new growth vertical to Abbott's already high single-digit growth profile

American firms Abbott and Exact Sciences have announced a definitive agreement for Abbott to acquire Exact Sciences, which will enable it to enter and lead in fast-growing cancer diagnostics segments, serving millions more people.

Under the terms of the agreement, Exact Sciences shareholders will receive \$105 per common share, representing a total equity value of approximately \$21 billion.

Together, the companies will accelerate innovation, expand access to life-changing diagnostics, and help more people detect and manage cancer at its earliest, most treatable stages.

Exact Sciences focuses on the early detection of cancer and supporting personalised treatments. Exact Sciences' comprehensive product offerings support patients and their healthcare providers before, during and after a cancer diagnosis. The company is a leader in cancer screening, precision oncology and genetic testing, helping to detect cancer earlier, guide treatment decisions and monitor for recurrence.

Its product offerings include the Cologuard® test, a market-leading noninvasive colorectal cancer screening option; Oncotype DX®, which informs personalized treatment decisions for patients with breast cancer; Oncodetect™, which identifies molecular residual disease (MRD) to help assess the risk of recurrence and guide follow-up care; and Cancerguard™, a multicancer early detection blood test.
