

Dubai Health and Dubai Future District Fund join forces to build global health tech launchpad

March 25, 2026 | News

MoU is aimed at advancing innovation across biotech, digital health, AI diagnostics

Dubai Health and Dubai Future District Fund (DFDF) have announced the signing of a Memorandum of Understanding (MoU) that sets the foundation for a collaboration to advance Dubai's global position in the HealthTech sector.

Aligned with Dubai's D33 Economic Agenda, this strategic partnership aims to build a HealthTech and TechBio ecosystem anchored in Dubai by accelerating the success of high-impact ventures and advancing innovation across Biotech, digital health, AI diagnostics, drug discovery, robotics, medical devices and personalised medicine.

By coordinating resources and expertise across public and private sectors, Dubai Health and DFDF will work together to generate globally relevant clinical and commercial evidence.

By leveraging academic research and translational opportunities to drive meaningful outcomes, the collaboration seeks to align innovation with healthcare needs, support knowledge transfer and intellectual property development, and foster a thriving ecosystem that advances health innovation and delivers tangible benefits for patients and the wider community.
