CPhI-Pharma Outsourcing Event to be held in Korea

April 24, 2012 | News | By BioSpectrum Bureau

Singapore: CPhI Korea 2014, a new content-led exhibition will begin in Seoul Korea, from September 2, 2014. The two day event includes various conferences, exhibitions, networking events and a matchmaking program.

CPhI Korea aims to provide an unrivaled opportunity to network, source and build partnerships with domestic companies to augment the next stage of development in the rapidly maturing Korean markets.

The huge connection of KPTA with leading pharmaceutical manufacturers is expected to recruit high quality domestic exhibitors as well as visitors.

The exhibition floor will host a wide range of companies specialized in pharmaceutical ingredients and contract services, bringing together buyers and sellers in the fast growing Asian pharma sector.

KPTA has contributed to the development of the ex-importing pharmaceutical products through various trade promotion activities, such as trade information, market research services and business matchmaking. KPTA assists Korean importers by evaluating import documentation and issuing import permits for customs clearance of pharmaceuticals, herbals and quasi drugs.

Korea has shown a steady growth rate of over 10 per cent in both exports and imports until now with expected annual average growth rate of 6.5 per cent until 2015. It is reported that CPhI Korea has received immense response from overseas.
