

ZEISS Medical Technology signs strategic agreement with Aier Eye Hospital Group in China

June 18, 2026 | News

Aiming to set a new quality benchmark for refractive surgery worldwide

Germany-based ZEISS Medical Technology held a signing ceremony with the Aier Eye Hospital Group, China, entering into a strategic agreement for the purchase and installation of 25 ZEISS VISUMAX 800 femtosecond lasers across multiple Aier Eye Hospital locations.

The 25 ZEISS VISUMAX 800 systems covered by this agreement will be progressively deployed across Aier Eye Hospital's domestic and international networks starting later in 2026.

The strategic partnership between ZEISS Medical Technology and Aier Eye Hospital Group aims to enhance high-quality patient care through technological innovation, helping to bring precise and well proven refractive surgery to patients worldwide.

"Aier Eye Hospital is one of ZEISS Medical Technology's most important global strategic partners. In the future, the two parties will explore deeper collaborative innovation in areas such as international expansion, integrated digital workflows and platforms, and AI-assisted diagnosis," said Martin Fischer, President & CEO of ZEISS Greater China.
