

Pall inaugurates Centre of Excellence in China

16 October 2013 | News | By BioSpectrum Bureau

Singapore: Pall Corporation, a global leader in filtration, separation and purification, has inaugurated Pall Life Sciences Centre of Excellence (CoE) at its Zhangjiang site in Shanghai, China.

The new Centre of Excellence, which offers biopharmaceutical process solutions, technical and validation support as well as training, extends Pall's local capabilities for its growing base of life sciences customers in the region.

“This year marks the 20th anniversary of Pall's expansion into China. The opening of the Shanghai Life Sciences Centre of Excellence is another milestone in Pall's development in China,” said Mr. Larry Kingsley, Chairman and CEO, Pall Corporation.

The new CoE is equipped with the most advanced capabilities for process demonstration, testing and validation. Customers also can consult with Pall experts about equipment selection, installation and adjustment. Integrated with the CoE at the Shanghai facility is a branch office that serves both the company's Life Sciences and Industrial customers.

“China is an important market for Pall and long-term, favorable economic trends give us the confidence to continue development in the potentially high-growth region,” said Mr. Hang Gek Low, Vice President, Pall China. “The establishment of the Shanghai CoE enhances our ability to service customers in the area while enabling us to provide dedicated support for Chinese enterprises exploring overseas markets.”
