## Suven secures three product patents for their NCEs in Canada, Japan and Korea

Suven Life Sciences Ltd, headquartered in Hyderabad, India, secured product patents from Canada, Japan and Korea corresponding to the New Chemical Entities (NCEs) for the treatment of disorders associated with Neurodegenerative diseases and these patents are valid through 2030.

The granted claims of the patents include the class of selective 5-HT compounds discovered by Suven and are being developed as therapeutic agents and are useful in the treatment of cognitive impairment associated with neurodegenerative disorders like Alzheimer's disease, Attention deficient hyperactivity disorder (ADHD), Huntington's disease, Parkinson and Schizophrenia.

With these new patents, Suven has a total of 18 granted patents from Canada, 16 granted patents from Japan, and 16 product patents from Korea.

These granted patents are exclusive intellectual property of Suven and are achieved through the internal discovery research efforts. Products out of these inventions may be out-licensed at various phases of clinical development like at Phase-I or Phase-II.
