Eppendorf opens nomination for Neurobiology Prize 2015

Singapore: BioSupplier company, Eppendorf, and journal Science have opened applications for 2015 Eppendorf and Science Prize for Neurobiology.

The annual international research prize of \$25,000 is awarded to young scientists for their outstanding contributions to neurobiology research based on methods of molecular and cell biology. Researchers who are 35 years of age or younger are invited to apply by June 15, 2015. The winner and finalists are selected by a committee of independent scientists, chaired by Science's senior editor, Dr Peter Stern.

The 2014 prize was won by the US scientist Dr Eiman Azim, postdoctoral research fellow, Columbia University, New York. Dr Eiman Azim's work offers fundamental new insights into the neural mechanisms that enable skilled limb movements to be both smooth and precise. His research has provided direct support for long-standing theories about the roles of internal feedback pathways within the central nervous system and external feedback from the muscles in regulating fine motor control.
