

Cliantha uses Acceliant software to manage trials

27 February 2013 | News | By BioSpectrum Bureau

Singapore: India based contract research organization (CRO), Cliantha Research has implemented Acceliant's eClinical Suite for their clinical trial data management needs. Acceliant is the medical industry technology division of Trianz, a global technology services and solutions company.

Speaking of the partnership, Mr Hitesh Chauhan, associate director of biometrics at Cliantha Research, said, "We evaluated and selected Acceliant eClinical Suite because we found it to be very user-friendly and superior to several other products. Besides being a platform with best-in-class features, Acceliant's eClinical Suite is architected process and system wise to drive efficiency, lower costs and accelerate clinical trial studies."

On the occasion, Mr Ven Thangaraj, CTO, Acceliant, said, "The Life Sciences industry is going through dramatic changes and pressures to innovate while keeping costs under control. Acceliant is one of the few integrated EDC-ePRO platforms with innovative workflows and built-in mobility which allows data management from anywhere, anytime."

Mr Santhosh S Nagaraj, Acceliant's India sales head, commented, "We are proud to be associated with Cliantha Research and helping them in their clinical studies. Our differentiation as a robust platform that accelerates trials through efficient data management is what helped us win. We look forward to a successful long-term relationship and continued growth in India."
