Singapore: Advanced Micronic Devices' (AMDL) healthcare division, AMDL Health, launched Mediaid ventilators and anesthesia work stations at the 60th ISACON 2012, which is being held from December 26-29, 2012, at Labh Ganga Convention Center, Indore. AMDL is a leading provider of medical equipment and devices and a group company of Opto Circuits.

The products to be launched at the 60th ISACON 2012 are Model AD Premium 910 Anesthesia Workstation, Model Vent Care 410 ICU Ventilator and Model Vent Mini Portable Ventilator.

Model AD Premium 910 Anesthesia Workstation is an anesthesia machine for neonatal pediatric and adult used by anesthesiologists to support the administration of anesthesia. Model Vent Care 410 ICU Ventilator is an intensive care unit (ICU) ventilator used to assist or replace the spontaneous breathing of an ICU patient.

Model Vent Mini Portable Ventilator is a portable ventilator that helps patients to breathe when they are suffering from respiratory illnesses and can either be used at home or carried to other locations.

"We are very glad to be associated with a large anesthesia event in India. Introducing our new products on such a platform will enable us to strengthen our presence in the Indian anesthetic market," said [Mr Arindam Sen, CEO, AMDL](#). He further added that, "This is a step forward in our commitment towards launching technologically advanced devices in the Indian healthcare market."
