

Lipitor leads in Australia

11 June 2012 | Analysis | By BioSpectrum Bureau

Lipitor leads in Australia pharmaceutical market

Australia, with its 2011 revenue of \$13 billion, occupies the second largest share of the Asia Pacific pharma market followed by China. According to BioSpectrum Top20 survey for the Asia Pacific market, [Australia](#) witnessed significant improvements in past revenues, which stood at \$11 billion in 2010 and \$9 billion in 2009.

Over the past few years, Australia has emerged as a very good potential market for pharmaceutical investment in the Asia Pacific region. There seems to be a persistent prevalence of lifestyle diseases in Australia, as is evident from the ranking of the top 10 products since the past few years. Lipitor and Crestor continue to maintain their top positions with revenue of \$617.3 million and \$363 million respectively as compared to \$559 million and \$283 million in 2010. Genentech's Lucentis earned \$293.6 million and secured the third position in Australia. Lucentis is a prescription medicine for the treatment of patients with age-related macular degeneration and macular edema following retinal vein occlusion. The prevalence of heartburn problems and acidity led AstraZeneca's Nexium to touch revenue of \$187.9 million as compared to \$177.8 million in 2010.

Other products who made it to the top included Humira, with revenue worth \$178 million; Seretide, with revenue worth \$174.8 million; Zyprexa with \$151.8 million; Enbrel, with revenue worth \$119.2 million; Seroquel, with revenue worth \$110 million; and Spiriva, which recorded revenue of \$109.8 million.
