Enhance the clinician experience with real-time data solutions in AWS Marketplace

April 11, 2022 | News

Join this webinar to learn how actionable and real-time insights help clinicians identify how to pivot, respond, and provide a better patient experience.

Register now

In this webinar:

From resourcing needs to escalating value-based care demands, clinicians face new challenges and pressures to innovate to meet rapidly changing expectations. Healthcare organizations are turning to innovative technologies to help address these challenges. By using technology solutions, clinical leaders can quickly and easily monitor, evaluate, and adapt care across patients, treatments, teams, and workflows.

Key takeaways include:

- Operational improvement and efficiencies
- Patient care enhancement
- Health equity improvement
- Employee engagement
- Insights of the latest solutions from AdaptX, Huron, and Hyland in AWS Marketplace

Moderator:

Michael Leonard

Global Healthcare Category Lead, AWS Marketplace

aws marketplace

Michael is responsible for growing the AWS Marketplace healthcare vertical business. His previous role was a Principal Product Manager on the AWS Storage Gateway team. Over the past 20 years, Michael has progressed through a variety of roles in business development, product management, and engineering at AWS, Commvault, Iron Mountain, Merge Healthcare, and GE Healthcare. He built and managed teams to develop Healthcare IT solutions focused on medical imaging, EHR systems, hybrid cloud storage services, and data protection solutions.

Presenter:

Dr. Martin

Medical Director, Continuous Improvement and Innovation, Seattle Children's Hospital

Seattle Children's

Lynn D. Martin, M.D., M.B.A. is the Medical Director, Continuous Improvement and Innovation at Seattle Children's. He is a Professor of Anesthesiology and Pediatrics (adjunct) at the University of Washington School of Medicine. He received his M.D. from the University of Washington and his M.B.A. from the University of Tennessee. He completed residencies in both Pediatrics (Phoenix Children's Hospital) and Anesthesiology (Johns Hopkins University) followed by fellowships in pediatric anesthesiology and pediatric critical care medicine at Johns Hopkins University. He is board certified by the American Board of Anesthesiology with specialty certification in pediatric anesthesia and the American Board of Pediatrics with specialty certification in pediatric critical care medicine. Dr. Martin has served as the president of the Society for Pediatric Anesthesia. His original research interests involved conventional and non-conventional forms of mechanical ventilation and more recently focus on quality improvement, patient safety, and operative outcomes research.
