Take The Lead in Revolutionising Pharma Regulation with 2023 PDA Asia Pacific Conference

November 11, 2023 | News

2023 PDA Asia Pacific Regulatory Conference & Sponsored Workshop to take place from 28 November to 30 November

The upcoming 2023 PDA Asia Pacific Regulatory Conference & Sponsored Workshop is all set to kick off a transformative learning experience for regulatory and industry professionals. The event will unfold over 3 days in Melbourne, Australia, with the Conference taking place on 28-29 November and the Sponsored Workshop taking place on 30 November.

The emergence of new technologies and significant shifts in business conditions due to the COVID-19 pandemic have resulted in pharmaceutical regulations evolving at an unprecedented pace. In response to this, the conference aims to tackle the most critical changes in guidelines and industry practices, ensuring that you are not only well-equipped but also thoroughly prepared to navigate the complexities of the regulatory landscape.

Over the first 2 days, attendees can expect a deep dive into regulatory strategies concerning Combination Products, Artificial Intelligence (AI), Investigative Medicinal Products (IMPs) and Advanced Therapy Medicinal Products (ATMPs). The conference will also go in-depth into crucial guidelines including the revised Annex 1, ICHQ12, ICHQ1A (R2), Quality Management Maturity (QMM) programme, among others. Get ready for interactive panel discussions where speakers and delegates exchange ideas and expand upon the session topics, announcements from the Science Advisory Board, as well as first-hand updates on compliance revisions from regulatory experts from the US FDA and the TGA.

Attendees can also extend their educational experience by attending the post-conference sponsored workshop, designed to supplement learnings gained from the conference and provide insights into the latest advancements in quality control methodologies. Expect key topics on sustainable bacterial endotoxin testing, alternative methods such as rFC and RMM, and studies on the proposed USP chapter <86>. Engage with our subject matter experts, Jay Bolden from Eli Lilly and Robyn Hofer from CBE Pure Solutions, as well as gain practical skills which can help you develop quality control strategies for your company.

Don’t miss this opportunity to explore the latest developments and expertise to propel your company forward in the pharmaceutical regulatory space. We look forward to seeing you at the 2023 PDA Asia Pacific Regulatory Conference & Sponsored Workshop!
