Kingworld Medicines officiates operation at Kingworld-Longde Life and Health Industrial Park, in China

November 27, 2024 | News

Industrial park covers 10,000 square meters with a total construction area of 57,000 square meters dedicated to pharmaceutical and biomedical industry establishment in Bao'an Technology City, Shenzhen

A leading healthcare distribution company, Kingworld Medicines Group Limited, has officially started operations at the Kingworld-Longde Life and Health Industrial Park ("Longde Health Industrial Park" or "Industrial Park") in Bao'an Technology City, Longgang District, Shenzhen.

An opening ceremony, investment promotion conference, and investor tour were successfully conducted, establishing the Greater Bay Area as a national center for the pharmaceutical industry incubation and investment. Additionally, Foci and Kingworld jointly launched their new product "Foci Kingworld An Gong Niu Huang Wan" on the same day.

The Longde Health Industrial Park located at the strategic intersection of Shenzhen's Eastern High-speed Rail New Town and International Low-Carbon City, the park covers 10,000 square meters with a total construction area of 57,000 square meters.

As a key strategic project of Kingworld Medicines, the Longde Health Industrial Park leverages Kingworld's 30-year global pharmaceutical supply chain resources, mature sales network, and marketing capabilities. It actively integrates pharmaceutical supply chain resources to help park enterprises effectively expand their market channels and provides targeted professional support in financing, listing, policy, and legal matters to accelerate the incubation of pharmaceutical projects and brands aligned with the Group's strategic direction. The Industrial Park has also established innovation platforms, including a Greater Bay Area Youth Exchange Base and Hong Kong Medicine Landing Platform.

Zhao Li Sheng, Chairman of Kingworld Medicines, stated: "The Longde Health Industrial Park, as a strategic project in Kingworld Group's Fifth Five-Year Plan, represents a significant milestone in the Group's development. We aim to build a modern, intelligent, and green health industrial park integrating R&D, production, logistics, and sales, effectively consolidating and maximizing the Group's health industry resources."

The Longde Health Industrial Park located at the strategic intersection of Shenzhen's Eastern High-speed Rail New Town and International Low-Carbon City, the park covers 10,000 square meters with a total construction area of 57,000 square meters. The park features high-standard production facilities and supporting infrastructure, including pharmaceutical waste treatment facilities, backup power supply systems, and centralized pharmaceutical wastewater treatment systems, providing comprehensive support for the diverse needs of resident enterprises.
