Dubai's IntelliDent AI partners with MAHE in India to boost healthcare through AI

June 24, 2025 | News

To scale accessible, AI-powered dental care globally

IntelliDent AI, a Dubai-based healthtech innovator transforming dentistry through artificial intelligence, has signed a Memorandum of Understanding (MoU) with the Manipal Academy of Higher Education (MAHE), India, an Institution of Eminence and global academic leader.

This strategic three-year partnership aims to accelerate advancements in AI-powered oral healthcare through collaborative research, education, and entrepreneurship.

The MoU, executed on behalf of MAHE's Manipal College of Dental Sciences (MCODS), Mangalore, lays the foundation for academic-industry cooperation focused on developing future-ready dental AI solutions and equipping students with the technical and entrepreneurial skills to lead the next era of digital healthcare.

Key Pillars of the Collaboration:

- **Joint Research Programmes:** MAHE and IntelliDent will co-develop research initiatives in AI-driven diagnostics, public health, and healthcare innovation, contributing to academic publications, patents, and whitepapers.
- **Training & Internships:** MAHE students will gain hands-on exposure through internships and mentorships at IntelliDent, supported by industry insights, guest lectures, and workshops.
- **Entrepreneurial Development:** The collaboration will foster cohort-based learning modules, innovation hackathons, and startup support to accelerate the commercialisation of student-led healthtech ideas.
- **Knowledge Exchange:** Faculty, researchers, and industry experts will engage in reciprocal learning and cross-training to fuel innovation, skill-building, and strategic growth.
