

DHL adds new facility in Malaysia catering to APAC's life science and healthcare sector

August 28, 2025 | News

Sets new benchmark in pharmaceutical logistics with reefer truck transfers, secure cages, and eco-friendly infrastructure

To meet the growing demand for temperature-sensitive pharmaceutical logistics, DHL Global Forwarding continues to enhance its cold chain capabilities in Malaysia, being the first forwarder to offer a cold chain facility certified for both 15–25°C and 2–8°C storage within the Kuala Lumpur International Airport (KLIA) Free Commercial Zone.

Spanning over 38,000 square feet, the state-of-the-art facility is accorded both the DHL Air GxP certification and the IATA CEIV Pharma certification, delivering unmatched flexibility and regulatory compliance for Life Science and Healthcare customers.

To ensure all shipments are handled with utmost care and in compliance with the highest industry standards, all cold-chain shipments are handled by a dedicated team of Life Sciences Specialists who have completed the training and are certified.

Asia Pacific is rapidly emerging as a global center for pharmaceutical innovation, manufacturing, and distribution. According to an industry trend report by Data Bridge Market Research, the region's healthcare logistics market is forecasted to grow from \$17.6 billion in 2022 to \$29.5 billion by 2030, at a CAGR of 7.1%.

Currently, DHL operates 37 Air GxP-certified stations and 12 IATA CEIV Pharma-certified stations in the region, including key hubs in Kuala Lumpur, Singapore, Tokyo, Seoul, Sydney, and Shanghai.
