The Discovery & Development Summit Asia 2025: Advancing Therapeutics and Precision Medicine Through Collaboration and Innovation

September 10, 2025 | News | By Hithaishi C Bhaksar

Global Engage organized Discovery & Development Summit Asia 2025 n Singapore on 9th and 10th September convening global expertise in bioscience and pharma innovations

Global Engage presented '**The Discovery & Development Summit Asia 2025**' a premier breakthrough event in **Singapore** on 9**th and 10th September**.

The Discovery & Development Summit Asia 2025 harnessed the momentum of the rapidly evolving life sciences sector, providing a premier platform for academics, industry leaders, and biotech innovators to share transformative ideas and drive the advancement of next-generation therapies.

The event brought together the thought leaders from the global bioscience landscape and the revolutionary breakthrough life sciences innovations across the globe to drive advancements in therapeutic development.

The event featured three concurrent congresses: The event featured three co-located congresses, each focusing on cutting-edge developments in modern therapeutics and precision medicine.

- **Drug Discovery and Development Asia**
- **Nucleic Acid Therapeutics Congress Asia**
- **Precision Medicine Congress Asia**

A dynamic, cross-sectoral dialogue, interactive sessions, and strategic networking shaped the future of drug discovery and development in Asia during the two-day summit. The sessions delved into the latest advancements in genomics, personalized medicine, and novel therapeutic modalities, highlighting Asia's growing influence in the global biotech ecosystem.

Over two days, attendees engaged in panel discussions, fire-side chats, and flash talk sessions, while benefiting from interactive workshops and extensive networking opportunities.

The summit served as a dynamic platform for academics, industry leaders, biotechnology entrepreneurs, and regulatory experts to collaborate and exchange transformative ideas in a constructive manner.

The summit featured over **30 distinguished speakers**, provided more than 7 hours of dedicated networking opportunities, and showcased poster presentations alongside an exhibition of cutting-edge products and technologies, all centered around advancing therapeutic science and fostering innovation in the life sciences industry.
