Thailand LAB INTERNATIONAL 2026 Opens in Bangkok, Putting Asiaâ??s Lab and Life Sciences Innovation in Focus

September 2, 2026 | News | By Sakshi Kulkarni | sakshi.kulkarni@mmactiv.com

Three-day industry gathering brings together laboratory technology, biotechnology, chemicals and life sciences communities from across Asia and global markets

Thailand LAB INTERNATIONAL 2026 kicks off today at the Bangkok International Trade & Exhibition Centre (BITEC), bringing together the laboratory, biotechnology, chemicals and life sciences ecosystem for three days of technology showcases, industry engagement and knowledge exchange.

Running from **2–4 September 2026 across Halls 102–104 at BITEC, Bangkok**, the exhibition provides a regional platform connecting technology providers, researchers, laboratory professionals, manufacturers, scientists and business leaders.

Thailand LAB INTERNATIONAL has established itself as one of Southeast Asia's prominent trade exhibitions and conferences serving **laboratory technology, biotechnology, chemicals and safety**, providing an important meeting point for companies seeking opportunities across Thailand and the wider Asian market.

The 2026 edition comes as Asia's laboratory and life sciences landscape continues to evolve, driven by growing investment in biotechnology, healthcare, pharmaceutical manufacturing, research infrastructure, advanced analytical technologies and laboratory automation.

This year's exhibition is set to showcase a broad spectrum of technologies, solutions and capabilities, while creating opportunities for industry stakeholders to explore partnerships, exchange technical knowledge and assess emerging trends shaping laboratories and scientific industries.

The event also provides international technology companies with a gateway to Thailand and Southeast Asia, while giving regional organisations an opportunity to connect with global suppliers, innovators and potential partners.

The strong international character of Thailand LAB INTERNATIONAL has been a defining feature of the event. The previous edition brought together **270 exhibitors and 500 brands from 30 countries**, demonstrating the platform's reach across the global laboratory and scientific community.

Alongside the exhibition floor, the gathering provides a setting for conversations around the changing requirements of modern laboratories — from greater automation and analytical precision to productivity, safety, sustainability and the increasing convergence of laboratory science with biotechnology and advanced manufacturing.

With confirmed exhibitors and start-ups participating in the 2026 edition, the event is also expected to provide visibility to both established technology providers and emerging companies bringing new solutions to the market.
Over the next three days, **Thailand LAB INTERNATIONAL 2026** will put Bangkok at the centre of conversations around the technologies, partnerships and scientific capabilities shaping the next phase of Southeast Asia's laboratory and life sciences sector.

Thailand LAB INTERNATIONAL 2026
Dates: 2–4 September 2026
Venue: Halls 102–104, BITEC, Bangkok, Thailand
