Envirotainer conducts logistics workshop in India

Singapore: Logistics solution provider, Envirotainer organized a workshop on active temperature control management for lifescience and pharma industry in Bangalore, Hyderabad, and Mumbai on February 11-13, 2015.

The workshop was focused on sourcing and managing the right partners to be compliance with the latest regulatory needs and industrial practice, cold chain management across multiple stakeholders in the pharma industry supply chain: upstream to downstream, challenges of global pharma MNCs when managing supply chains vendors (CMOs), risk assessment, life cycle of pharma products vs the logistic needs in delivery and distribution.

130 participants from pharmaceutical companies, forwarders and airlines attended the workshops held at three different locations. In addition to Ms Camille Madelon, strategy and business development director, Envirotainer; Mr Stephen Maietta, head of global accounts, Envirotainer; and Mr Suat Toh, head of sales-Asia Pacific, Envirotainer addressed the attendees.

Regulators from India including Pharmexcil, Pharmaceuticals Export Promotion Council, Food and Drug Authority of India and infrastructure providers including airport authority and Airport ground handler/Warehouse operator, airline partners and pharma manufacturers also participated in a panel to share their views.
